QUIZ LEAD READING GUIDE

How to read floguardfl.com quiz submissions as pre-done discovery and dial with speed.

FLOGUARD, LLC · FLOOD SOLUTIONS & MANAGEMENT · FLOGUARDFL.COM

SALES LIBRARY · 2026-07-22

Leads from floguardfl.com's 12-step drainage quiz arrive with **discovery already done**. Read the quiz block in the lead's notes before dialing — then don't re-ask what they already told you.

THE QUIZ FIELDS AND WHAT THEY TELL YOU

FIELD	SALES MEANING
issues	Which playbook to open: crawlspace/foundation → SumpPump; lanai/patio → YardDrainage; standing water → FrenchDrain
water_location	"Around the foundation" or "Crawlspace" = structural risk = urgency. "Backyard" alone = comfort/usability pitch
water_duration	The severity dial: "Several days" / "Never fully dries" = chronic groundwater = French drain conversation
frequency	"Every time it rains" beats "only heavy storms" — repetition = compounding damage frame
affected_size	Scope hint — sets assessment expectations, never a phone quote
existing_drainage	"An old French drain" = likely unlined/clogged (see burned-owner objection). "A sump pump" = Maintenance/upgrade angle
damages	Gold: "Foundation cracks or moisture", "Mold or musty smell", "Water inside" — these are the ROI reframe, in their own words
timeline	"ASAP" = call within the hour. "Just researching" = nurture cadence, no pressure
property_type	"Rental property" / "Commercial" → PropertyMgmt playbook and B2B tone
location	Neighborhood social proof ammo
photos	Look before you call — reference what you see

THE CALL

OPEN BY PROVING YOU READ IT

"You mentioned water stands around the foundation for a few days after every storm — that's exactly the pattern we engineer against." Then: one confirming question, the tailored pitch, and the assessment close. Quiz leads are warm — the close rate lives or dies on speed to first call (target: same day).

SCORING

Quiz answers feed the Drainage Need Score (see DRAINAGE-NEED-SCORE.md). An urgent-band DNS from quiz data = first-priority dial.
